SCIENTIFIC AND SCHOLARLY ACTIVITIES**CURRICULUM DEVELOPMENT**

3D Printing: Building the Hospital of the Future

Aug. 20 to March 25

Chaired and created educational content centering on the application of 3D Printing in the clinical environment for publication within the VA Health Care System.

3-9-27 Virtual Conference

June 20 to July 20

A weekly surgical case conference with 3 dedicated medical student learners answering questions of a surgical topic. Additional students observe the conference. There are a limit of nine slides and a time limit of 27 minutes.

Vascular Surgery Online (VSO)

July 15 to July 21

Dedicated completely online vascular surgery elective for third year and fourth year medical students at Virginia Commonwealth University School of Medicine. Currently in the content development phase with planned implementation in the spring of 2018.

Vascular Surgery Flex (VSF)

July 15 to July 21

Dedicated blended online and face to face vascular surgery elective for third medical students at Virginia Commonwealth University School of Medicine. Currently in the content development phase with planned implementation in the spring of 2018.

Surgical Ethics Online (SEO)

Dec 15 to present

Online elective development that introduces and teaches the principles of clinical ethics as it applies to surgical practice. Directed toward fourth year medical students at Virginia Commonwealth University School of Medicine. Previous piloted form of the curriculum has been implemented in the formal curriculum for fourth year medical students.

Vascular Surgery Endovascular Simulation (VSES)

July 14 to July 21

Endovascular based simulation skills educational program that is coordinated with the Richmond VAMC Simulation lab directed toward third year Virginia Commonwealth University School of Medicine students rotating on vascular surgery. Currently in the directed needs assessment stage and planned piloting of the program in the spring of 2016.
