Global Marine Consultant

Global Marine Advisor | Marine Terminal Assurance | Risk Mitigation and Optimization

Marine manager with proven global experience in managing shoreside, shipboard, offshore facility, and terminal operations within the petroleum industry. Successfully resolved complex issues by collaborating with international, federal, state, and local agencies. Recognized as an industry expert in terminal operations, incident management, safety, quality, and environmental affairs. Demonstrated proficiency in conducting port, terminal, and offshore assessments to optimize operations. Known for utilizing a robust network of global marine experts to effectively manage risk and enhance the performance of marine assets.

PROFESSIONAL HIGHLIGHTS

- A member of the ConocoPhillips Global Marine team worked with different Global Business Units to identify and mitigate risks as they were identified. Represented ConocoPhillips within the Oil Companies International Marine Forum (OCIMF) including the Ports and Terminal Committee developing industry guidelines to enhance the safety and environmental performance of the marine industry. Supported the implementation of the Guidelines for Offshore Marine Operations (GOMO) to implement best practices and safe vessel operations in offshore energy sector.
- A member of the ConocoPhillips Marine Tier One Incident Response team responding to actual oil spills, salvage operations and participating in Face to Face /Hybrid and Virtual responses and drills. Response roles included Incident Commander, Deputy IC, Operations Section Chief, Deputy OSC and Qualified Individual. The majority of these roles took place in the United States while several took place globally Beaufort Sea, Singapore, Australia, North Sea and Indonesia.

EXPERIENCE

ConocoPhillips Marine Risk Management

September 2013 – March 2022 (Retired)

Global Marine Assurance Lead, Houston, Texas

Deployed to various business units globally as part of the Marine Assurance Team, investigating, identifying, and providing marine expertise to resolve issues and manage risk.

- Developed and implemented the Marine Terminal Assessment Program, which globally assessed and mitigated risk for marine facilities used by ConocoPhillips. This involved integrating the program with commercial marine and developing a tracking system for providing feedback prior to contracting future facilities. Over 130 terminals were assessed without impacting commercial deals over a three-year period. The success of the program required overcoming numerous restrictions imposed during the covid pandemic.
- Provided valuable marine expertise globally, including regions such as Gulf of Mexico, Alaska, Canada, Africa, Malaysia, Indonesia, Australia, Norway and the United Kingdom. Frequently recognized for exceptional services provided to assist business units in achieving company goals.

ConocoPhillips Alaska**December 2011 – September 2013**

Chukchi Sea Marine Manager, Anchorage, Alaska

Created a comprehensive marine program to support ConocoPhillips' goal of drilling 3 exploration wells in the Chukchi Sea in 2014.

- Successfully managed a team of 5 marine experts, overseeing the optimization, integration, selection, and contracting of marine assets necessary for the project execution. The assets included a jack up drill rig, support vessels, shore bases, ice and weather forecasting.
- Developed and presented a program that received approval from ConocoPhillips' Executive Leadership Team and Joint Venture Partners, ensuring the alignment and support of the project.
- Collaborated with stakeholders outside of ConocoPhillips to provide a clear understanding of the marine aspects of the project and worked with the regulators to set clear expectations.

ConocoPhillips / Phillips 66 / ARCO Marine / OMI**February 1992 – December 2011**

Various positions and titles New York City, Valdez, Alaska and Houston Texas

Held positions within several different business units in the company that eventually became ConocoPhillips.

- Director of the Marine Terminal Advisors (3 years). Developed the Marine Terminal Assurance and Marine Terminal Advisor Programs. Captured over \$5 million in operational optimization and mitigated over risk identified prior to vessel arrival.
- Marine Manager Freeport LNG (3 years) Successfully defined the vessel and terminal limits including \$25.7 million channel widening project, lifting of the night time restrictions, resulting in an annual cost savings of \$1.2 million.
- Valdez Marine Superintendent (10 years). Managed all aspects of fleet of 7 tankers calling at VMT.
- Manager, Safety Quality and Environmental Affairs OMI (2.5 years). Achieved DNV ISM certification.

American Merchant Officers**May 1983 – February 1992**

Vessel Deck Officer World Wide on US flagged vessels. Sailed on various vessels ranging from 265,000 DWT tanker to 3500 DWT Ferry. Sailed as Master on a 35,700 DWT product tanker for the last two years.

EDUCATION**State University of New York, Maritime College, Bronx, New York**

Bachelor of Science – Business Management and Minor in Marine Transportation, 1983

TECHNICAL SKILLS
