## Professional Summary

Board-certified Certified Registered Nurse Anesthetist (CRNA) with extensive experience providing anesthesia care across hospital and outpatient surgical environments. Over 10 years of clinical experience at a Level I trauma center, managing complex perioperative cases including trauma, emergency surgery, and critically ill patients. Significant experience providing anesthesia care for high-risk obstetric patients, including labor analgesia, cesarean delivery, and obstetric emergencies.

Clinical expertise includes general anesthesia, regional anesthesia, monitored anesthesia care, advanced airway management, anesthesia pharmacology, and intraoperative hemodynamic monitoring. Experienced in delivering safe, evidence-based anesthesia care while collaborating with multidisciplinary surgical teams in both high-acuity and ambulatory surgical settings.

Available for medical-legal consultation, including anesthesia record review, case screening, and standard-of-care analysis related to perioperative management, airway complications, trauma anesthesia, and obstetric anesthesia.
