Summary Statement

As a PhD-prepared, dual-certified Pediatric Nurse Practitioner (CPNP-PC/AC), I bring extensive clinical experience across the full continuum of pediatric care, including primary care, urgent care, emergency medicine, and hospital-based settings. I have practiced at leading pediatric institutions such as Texas Children's Hospital, Cincinnati Children's Medical Center, Baylor, Scott, and White McLane Children's, and Nationwide Children's Hospital, as well as in diverse clinical environments through travel and contingent roles at Nemours Wolfson Children's Hospital, Oklahoma Children's Hospital, and Chisholm Trail Pediatrics.

My broad clinical background provides a comprehensive understanding of pediatric standards of care across varying levels of acuity and healthcare settings. I am experienced in the evaluation, diagnosis, and management of both routine and complex pediatric conditions, including high-acuity presentations in emergency and inpatient environments.

In addition to my clinical practice, I have served as an educator and preceptor for nurse practitioner and nursing students at multiple academic institutions, contributing to the development of clinical competency and adherence to evidence-based practice. This experience reinforces my ability to clearly articulate clinical reasoning, standards of care, and deviations from those standards.

As an expert witness, I provide objective, evidence-based opinions grounded in current clinical guidelines, accepted standards of practice, and real-world experience. I am committed to clear communication, thorough case analysis, and unbiased evaluation of medical care.

Skills

- Strong clinical judgment across pediatric care settings and acuity levels
- Ability to clearly articulate standards of care and clinical decision-making
- Excellent written and verbal communication skills
- Objective, detail-oriented case analysis
- Organized and efficient review of complex medical records
- Experience teaching and explaining clinical concepts to diverse audiences
- Ability to synthesize evidence-based literature with clinical practice
- Professional, reliable, and responsive in legal settings
